

### Monitor progress of Employeeeeship.

**'Employeeeship' is what it takes to be a great employee. Just as Leadership is what it takes to be a great leader.**

People display Employeeeship when they take responsibility for the results of the organisation, are loyal to the people and the goals of the business and take initiative to improve levels of productivity and quality as well as build relationships with others that work.

The Energy Meter is a tool that measures the Employeeeship in your organisation, and it provides four different types of reports:

**The Personal Employeeeship Meter** – determine, evaluate and develop a person's attitude, behaviour and commitment to the success of themselves and the organisation.

**The Departmental or Team Employeeeship Meter** – determine, evaluate and develop everyone's commitment to prosperity of the organisation.

**The Organisational Employeeeship (Soft) Culture Meter** – a sum of all the Departmental and Team meters that enables overview of results across the organisation.

**The Organisational Employeeeship (Hard) Culture Meter** – measure the degree with which the organisation's culture, systems and policies support and inspire everyone to do their best.
